

You may control activation of call features by the user portal website.

<http://voip.partnervoice.net/monster/>

Login: Password:

When login for the first time. User login will be your 10 digit phone number without any dashes. Password is: 1234

Feature	Description	Feature Activation	
Caller ID Block	For one call only, prevents your phone number from being displayed by the party you call.		*67
Call Return	Returns a call to the last party that called you.		*69
Accept	The Reject, Do-No-Disturb and Call Screening steps are by passed.	Web Portal	
Call Screening	The Caller will be prompted to record his/her name. The Caller will be notified with the Caller's name and provide the option to Answer, Direct to Voice Mail or Reject.	Web Portal	
Do Not Disturb	Do Not Disturb automatically sends any incoming call directly to the Caller's voice mail	Web Portal	*78 Activate *79 Deactivate
Forward Always	When Forward Always is enabled on the Subscriber, the Caller's device(s) will not be rung and the call will automatically be forwarded to the specified user or device. The same configuration and rules as described in section Forward Busy apply here.	Web Portal	*72 Activate *73 Deactivate
Forward Busy	Forward Busy will forward to the configured user or device if the dialed device is busy. It is possible to specify multiple forwards on busy to cover the case where the device forwarded to is also busy. This configuration is accomplished by adding multiple strings to the "Forward To" field, separated by spaces. In the case of forwarding to a user, having more than one forward will not apply. See below for an explanation of Forward to User vs. Forward to Device.	Web Portal	*90 Activate *91 Deactivate
Forward No Answer	When enabled, Forward No Answer will forward to the specified user or device if user's no-answer time-out expires. It is also possible to specify multiple forwards for this feature, as described in section Forward Busy.	Web Portal	*92 Activate *93 Deactivate
Reject	Reject and drop the incoming call without directing to voice mail	Web Portal	
Simultaneous Ring	The Simultaneous Ring feature enables multiple devices to ring at the same time when a call comes into the associated user. The concept of Simultaneous ring only applies to devices.	Web Portal Only	
Voice Mail	Check Voice Mail	Web Portal	5001

To setup your voicemail for the first time dial 5001 and you will be prompted with setup instructions. Your default password is 1234.
